The Joint Review Panel for the Darlington New Nuclear Power Plant Project today announces the final deadline of October 8, 2010 for the receipt of public comments on Ontario Power Generation's Environmental Impact Statement (EIS) and application for a Licence to Prepare a Site. The EIS and the licence application are intended to document the potential environmental effects of all phases of the project and address all requirements of a Licence to Prepare a Site - the first in a series of licences required over the lifetime of a new nuclear power plant. For more information, read the [CNW news release](#).
