DARLINGTON UNIT 4 OFF LINE FOR PLANNED MAINTENANCE OUTAGE

Clarington – Unit 4 at Darlington Nuclear was taken off line yesterday evening for a scheduled maintenance outage.

During the outage, maintenance and inspection will be conducted on the station turbines and steam generators, as well as routine inspections on reactor components and fuel channels.

The outage is part of Ontario Power Generation's (OPG) long-term asset management program, to ensure safe and reliable operations and optimum performance over the lifetime of the station. The timing of the outage was approved by the Independent Electricity System Operator (IESO), which has responsibility for ensuring there are adequate resources to meet expected demands for electricity.

Darlington Units 1, 2 and 3 continue to operate at or near full power.

About OPG:
Ontario Power Generation Inc. is an Ontario-based electricity generation company whose principal business is the generation and sale of electricity in Ontario. Our focus is on the efficient production and sale of electricity from our generation assets, while operating in a safe, open and environmentally responsible manner.
