INFORMATION ON PICKERING STATION

At about 10 o'clock this morning, a valve on one of the stations many safety systems inadvertently activated even though there was no safety event to prompt this. In these events well planned and rehearsed emergency plans are activated. Under these plans employees assemble in pre-determined areas to ensure they are safe and accounted for. External agencies are also notified. There was never any risk to staff, the community or the environment and staff are now back at work.
