**CAUTION URGED AS WATER LEVELS NEAR EAR FALLS FLUCTUATE**  
*Ice thickness may vary as water conditions change*

Ear Falls, Ont. – Ontario Power Generation warns that water levels below the Ear Falls Generating Station and on the upper English River, Pakwash Lake and Camping Lake will be unpredictable as water flows at the Ear Falls Generating Station will be reduced to allow for operational testing.

River users should use extreme caution as water levels may change rapidly and moving water can lead to thin, unstable ice conditions.
