ONTARIO POWER GENERATION'S PICKERING UNIT 7 OFF LINE

[Pickering, ON]: On April 6, Pickering Unit 7 came off line in response to a transformer ground fault on the transmission system.

While the unit is off line, maintenance has been scheduled on part of the Unit's reactor control system.

Pickering Units 1, 4, 5, and 6 are currently operating at or near 100 per cent full power delivering about 2,000 MW of electricity to the Ontario electricity grid. A planned maintenance outage for Unit 8 continues.

Ontario Power Generation Inc. is an Ontario-based electricity generation company whose principal business is the generation and sale of electricity in Ontario. Our focus is on the efficient production and sale of electricity from our generation assets, while operating in a safe, open and environmentally responsible manner.
