

Independent research groups that examine life-cycle CO₂ and CO₂ equivalency emissions:

- Central Research Institute of Electric Power Industry. (1995). *Life-cycle analysis of power generation systems*.
- CRIEPI (Central Research Institute of the Electric Power Industry) (1995). *Comparison of CO₂ Emission Factors between Process Analysis and I/O-Analysis*.
- Greenpeace and the European Renewable Energy Council. (2007). *Energy revolution, a sustainable world energy outlook*.
- Koch, F.F. (2000). *Hydropower-internalized costs and externalized benefits*. International Energy Agency.
- Meier, P. (2002). Life-cycle assessment of electricity generation systems and applications for climate change policy analysis. University of Wisconsin-Madison.
- Northwest Power Planning Council. (2002). *Natural gas combined-cycle gas turbine power plants*.
- Nuclear Energy Institute. (2007). *Life-cycle emissions analysis*.
- Parliamentary Office of Science and Technology. (2006). *Carbon footprint of electricity generation*.
- Spath, P. and Mann, M.K. (2000). *Life-cycle assessment of a natural gas combined-cycle power generation system*.
- The Pembina Institute. (2006). *Nuclear power in Canada: An examination of risks, impacts and sustainability*.
- U.S. Environmental Protection Agency Report. (2004). *Inventory of U.S. greenhouse gas emissions and sinks: 1990-2004*.
