

OPG RFP #NB137

ADDENDUM #1 – December 11, 2009

We have received the following question for RFP #NB137 and have provided clarification.

In the program requirements for the RFP it states "program must identify biodiversity conservation objectives and measures that can be tracked and measured". Does OPG have any specific biodiversity conservation objectives?

What is expected from Proponents is that the project they are proposing has certain biodiversity conservation objectives and we want to know what those are. That way we can evaluate the conservation value of the project. .
