

2022 Pickering Nuclear Groundwater Monitoring Program Results

September 2023

ONTARIO **POWER**
GENERATION

Annual Program Objectives

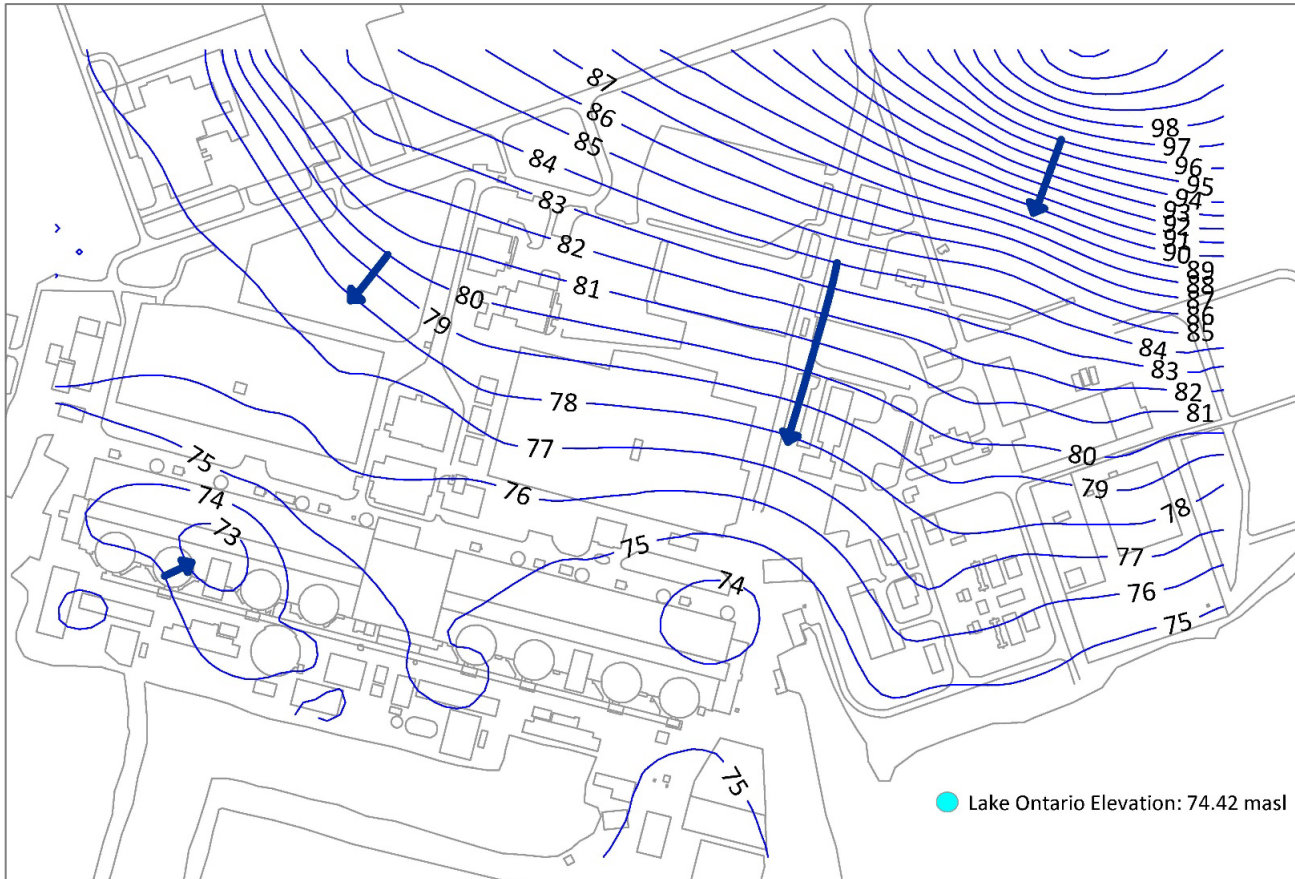

- Verify groundwater flow direction
- Monitor changes to on-site groundwater quality to identify new issues in a timely manner and assess historical issues
- Monitor groundwater quality at the site boundary to confirm there are no off-site impacts

PN | Program Overview

PN | Groundwater Flow Direction

Consistent with previous interpretations

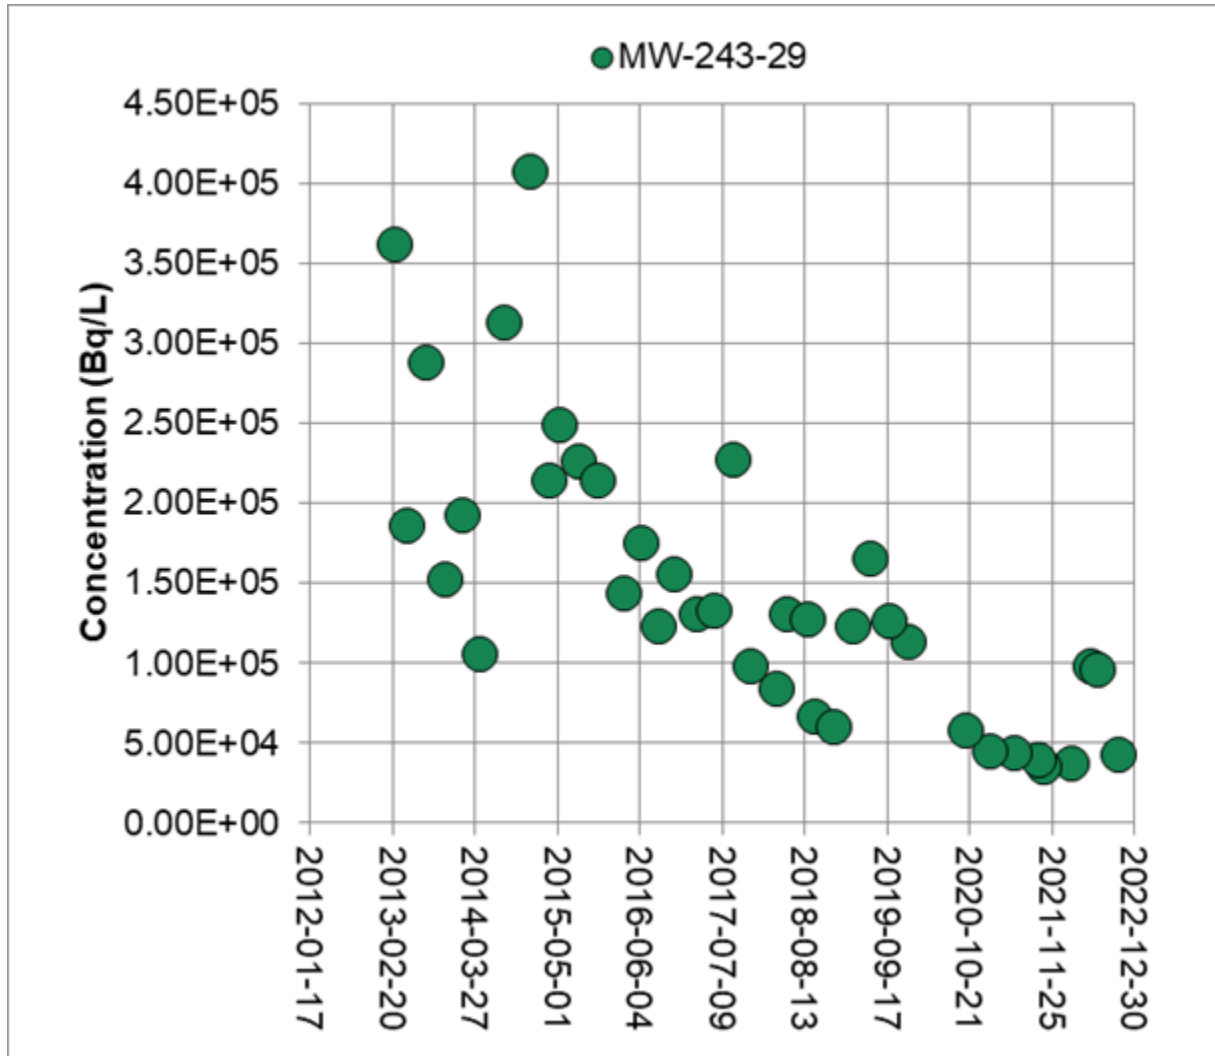

PN | Groundwater Quality

Key Areas Monitored

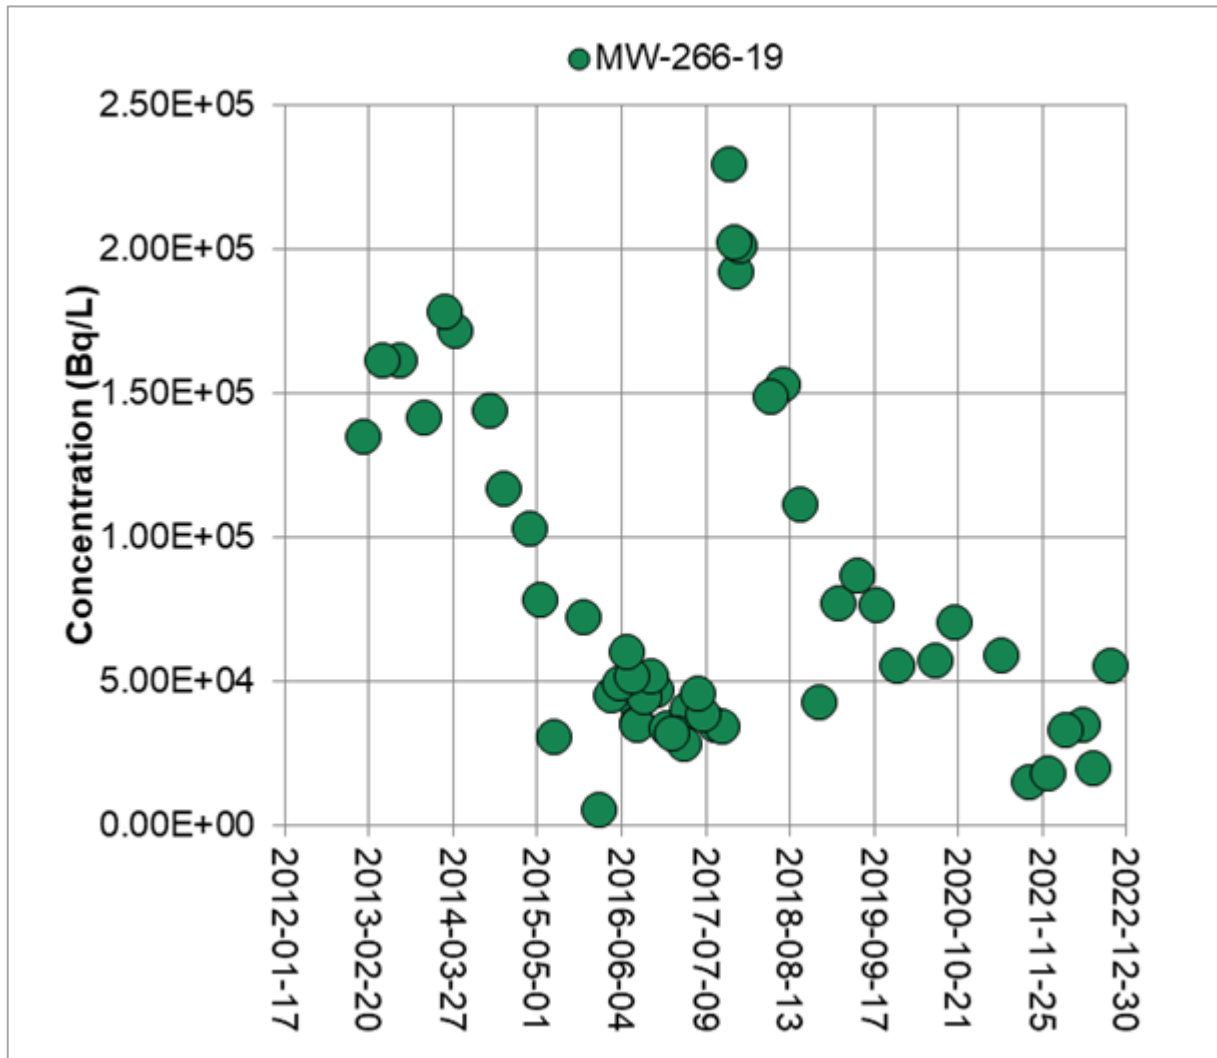

PN | Groundwater Quality

Unit 3 and Unit 4 Areas

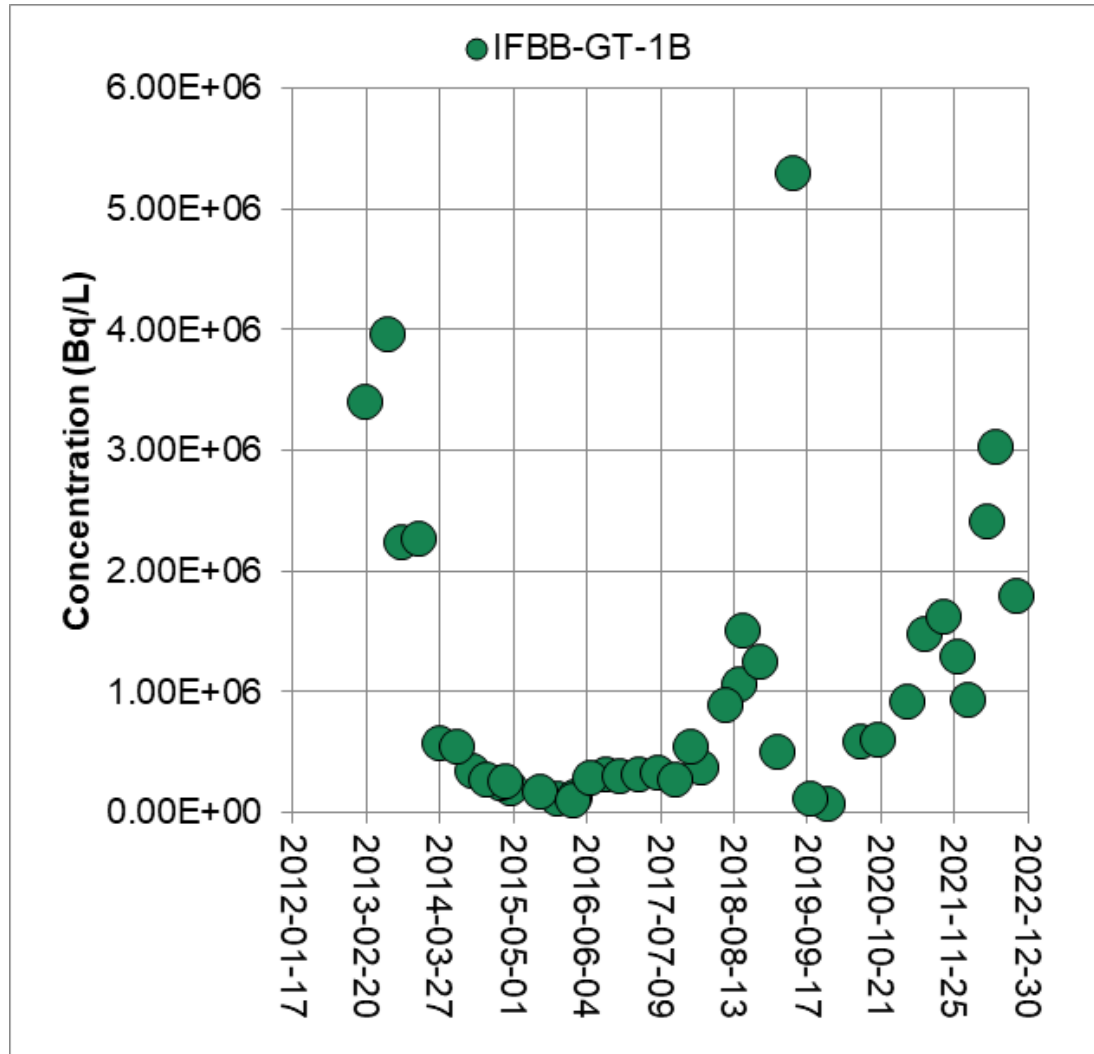

PN | Groundwater Quality

Unit 5 and Unit 6 Areas

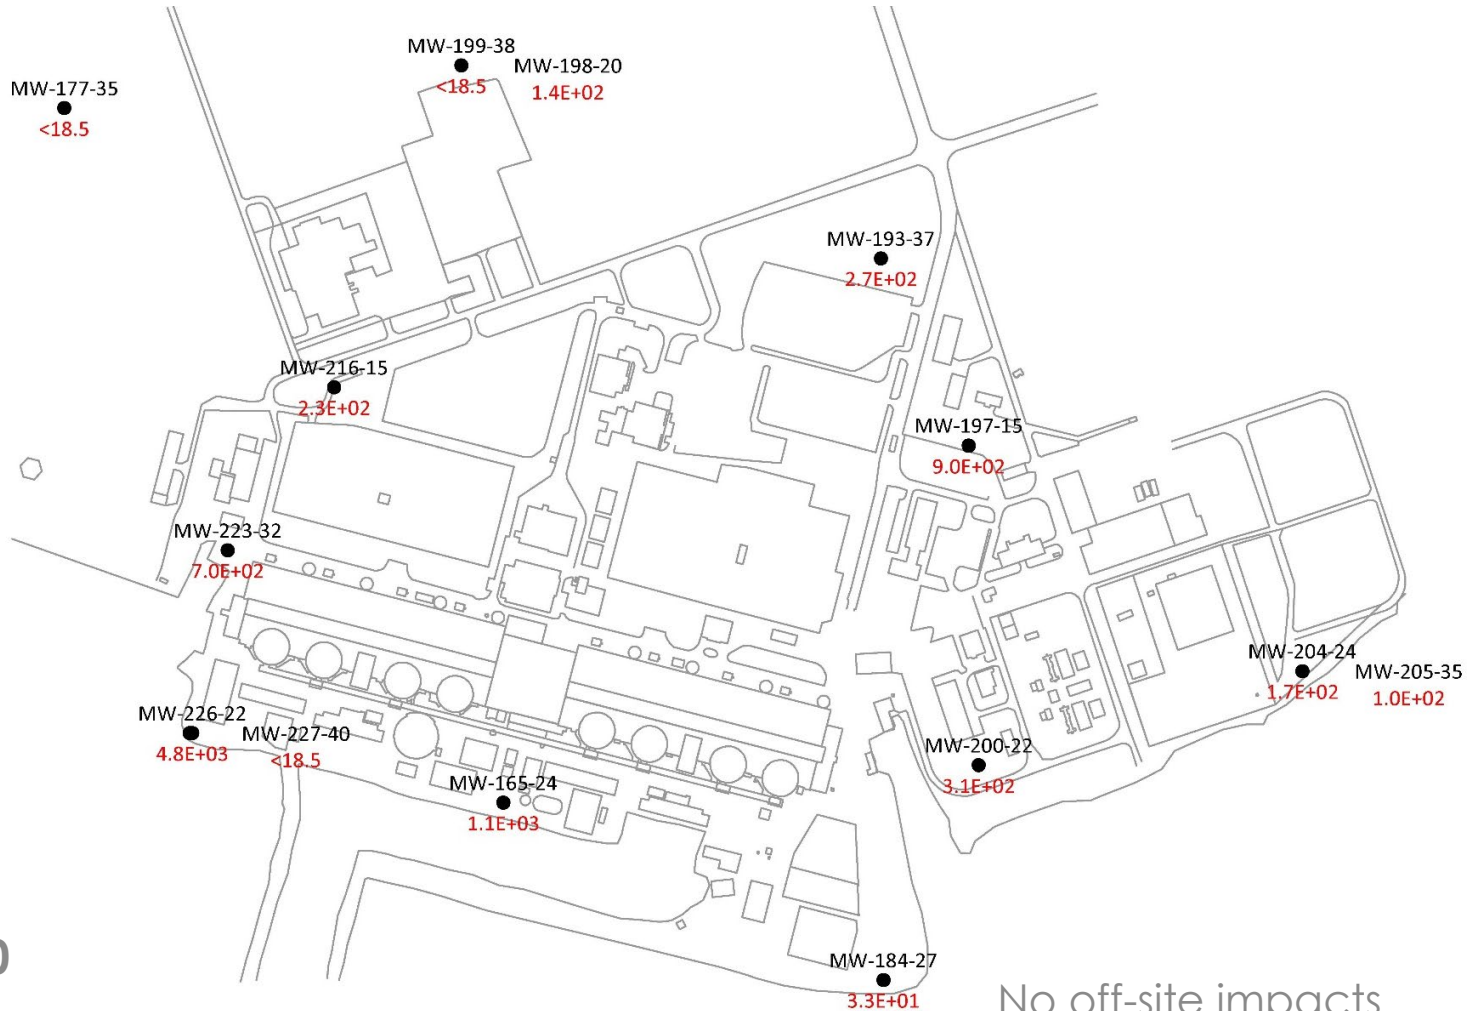

PN | Groundwater Quality

Unit 5 – 8 Irradiated Fuel Bay Area

PN | Site Boundary Groundwater Quality

2022 Summary

- The groundwater flow patterns at Pickering Nuclear remains consistent with original interpretations.
- Groundwater data collected from the key areas remained stable, which indicate consistent environmental performance.
- There were no indications of off-site impacts from PN groundwater
